

2014 INDUSTRIAL HYGIENE FORUM SERIES

Sponsored by
University of California Center for Occupational and Environmental Health & the Northern California Section of the AIHA

Thursday, December 11, 2014 • 1:00-4:00 PM

LOCATION ➔ **Elihu M. Harris State Building**
1515 Clay St., Room 11 (2nd floor), Oakland, CA

◆ **Silica: Playing Catch Up** ◆
Dan Cox, CIH & Dave Kahane, CIH, AIHA Fellow

The recognition of respiratory problems caused by silica dust dates back to ancient Greeks and Romans. As the single most common occupational lung disease worldwide and an irreversible condition with no known cure, identifying the underlying causes and potential prevention of silicosis is of paramount importance.

We will be identifying the various types of silica and silicates and looking at the history of their use in the U.S., as well as exploring ties between silicosis and cancer. We will note historic standards along with a new proposed standard from Federal OSHA. Case studies, sample collection, and analysis will help identify exposures as well as increase our understanding of potential problems. Then we will review exposures and controls, from neighborhood ambient air quality to larger, internationally based sources of contamination.

Accreditation: This event contains 3.0 hours of instruction and may be eligible for 0.5 ABIH CM credits.
Forum Series meets BCSP criteria for 0.75 COC point (0.25 COC point for each class)
Nurses: COEH is a California Board of Registered Nursing approved Provider BRN # 12983 / 3.3 contact hours.

Cost: The cost is \$60.00 per forum.

DATE	SPEAKERS	TOPIC
June 23, 2014	Hank McDermott	Professional Ethics
December 11, 2014	Dave Kahane, Dan Cox	Silica: Playing Catch Up
